Movex[®]

Moving through innovation

Your business is stepping
into the future.

Movex designs and manufactures **high-quality conveyor and conveying products** for the food, beverage, packaging, and automotive industries, and related automation processes. Movex meets your needs for both standard and custom products in a dynamic and responsive manner, providing the best in specialized-design and after-the-sale support capabilities.

Innovation and unsurpassed service-levels are the goals of a **highly-qualified, global sales and technical team** with the objective of presenting Movex as a **supplier-of-excellence** to companies of all sizes. Through a distribution-channel that **spans the globe**, Movex offers a **continually evolving product-line**, driven by ongoing technical innovation and the resolve to help move your business forward. **Always.**

Movex Curves

Movex Curves are designed to offer better conveyor performance. Suitable for steel and plastic chains, our curves are produced with computer controlled machines with a smooth chain guide surface.

Available in different materials and designs:

- Standard UHMW-PE (standard applications)
- BluLub (limited or no lubrications)
- RS (high performance)

Movex Curves produced in RS and BluLub materials need less energy and with a lower coefficient of friction, improve product stability and chain wear-life.

These curves are perfectly interchangeable with the standard design.

RS | BluLub®

PROFILES UHMW-PE and **BluLub®**
